

# How to connect with iOS devices

It will be handy if you save this screen before your voyage begins !

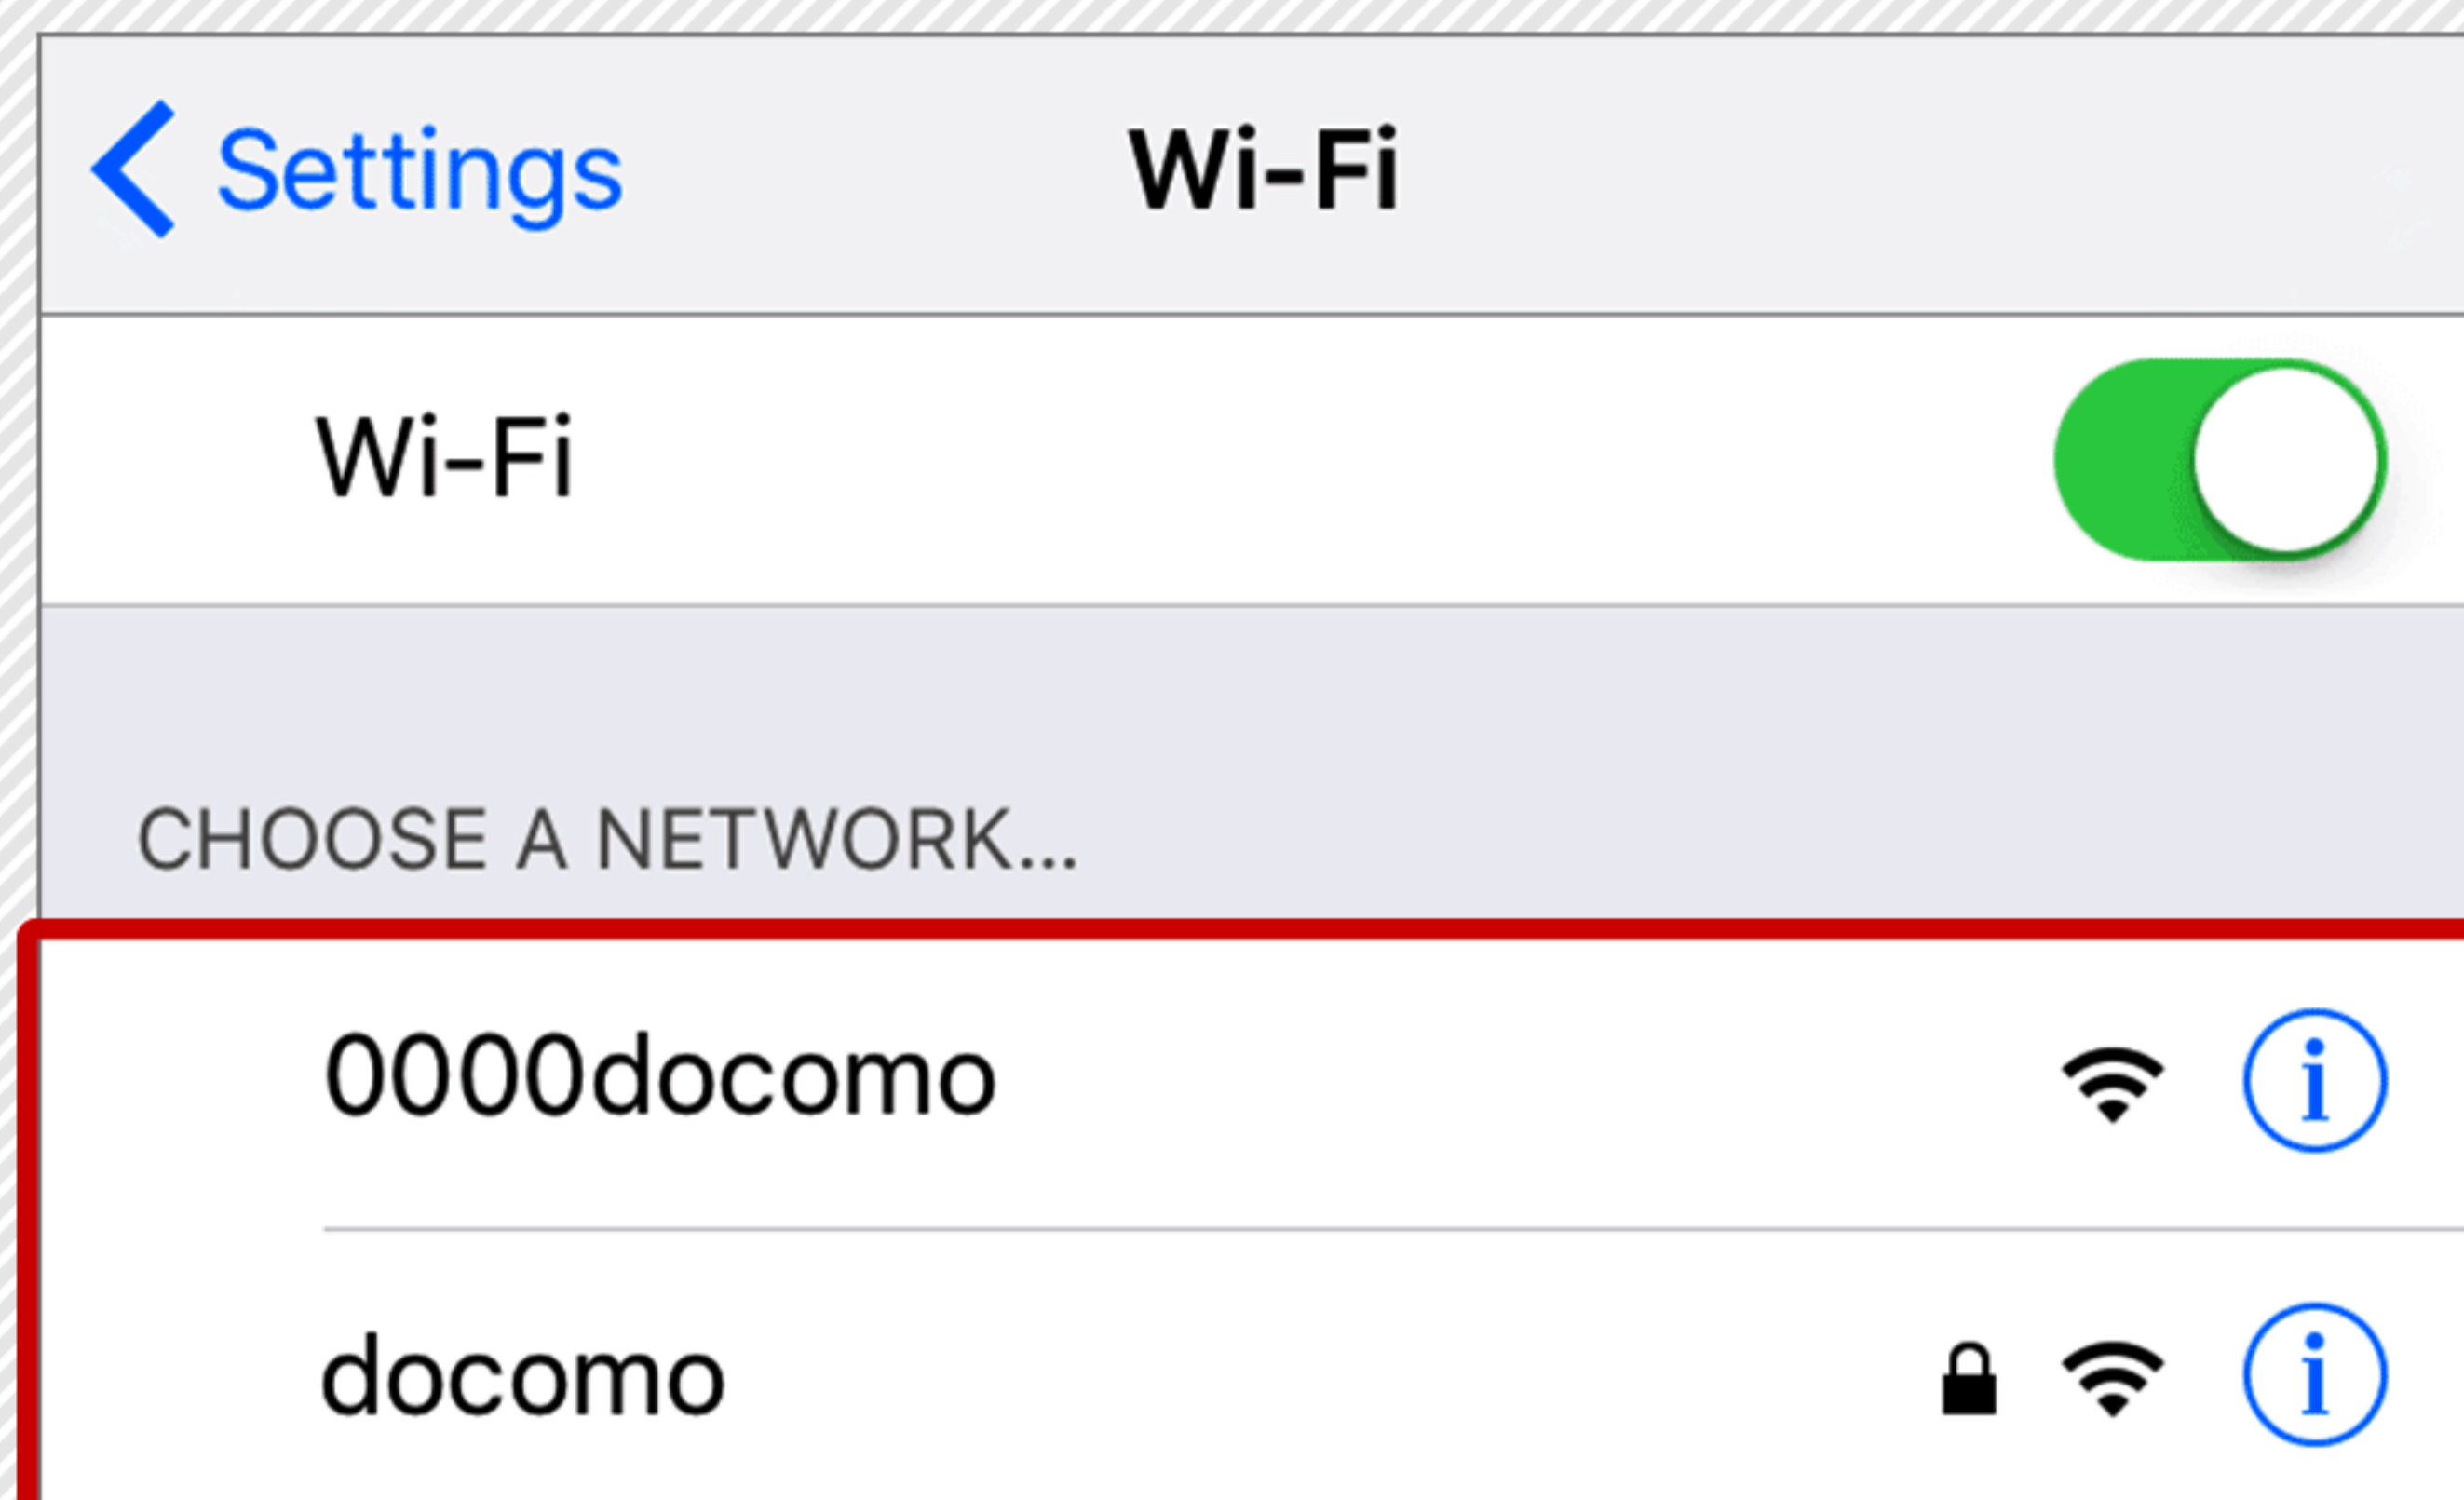

1

Select "Wi-Fi" from the settings screen at a docomo Wi-Fi spot.

>>

2

Either of the following Wi-Fi Network Name (SSID) can be used: "0000docomo" or "docomo". You may not use "0001docomo".

3

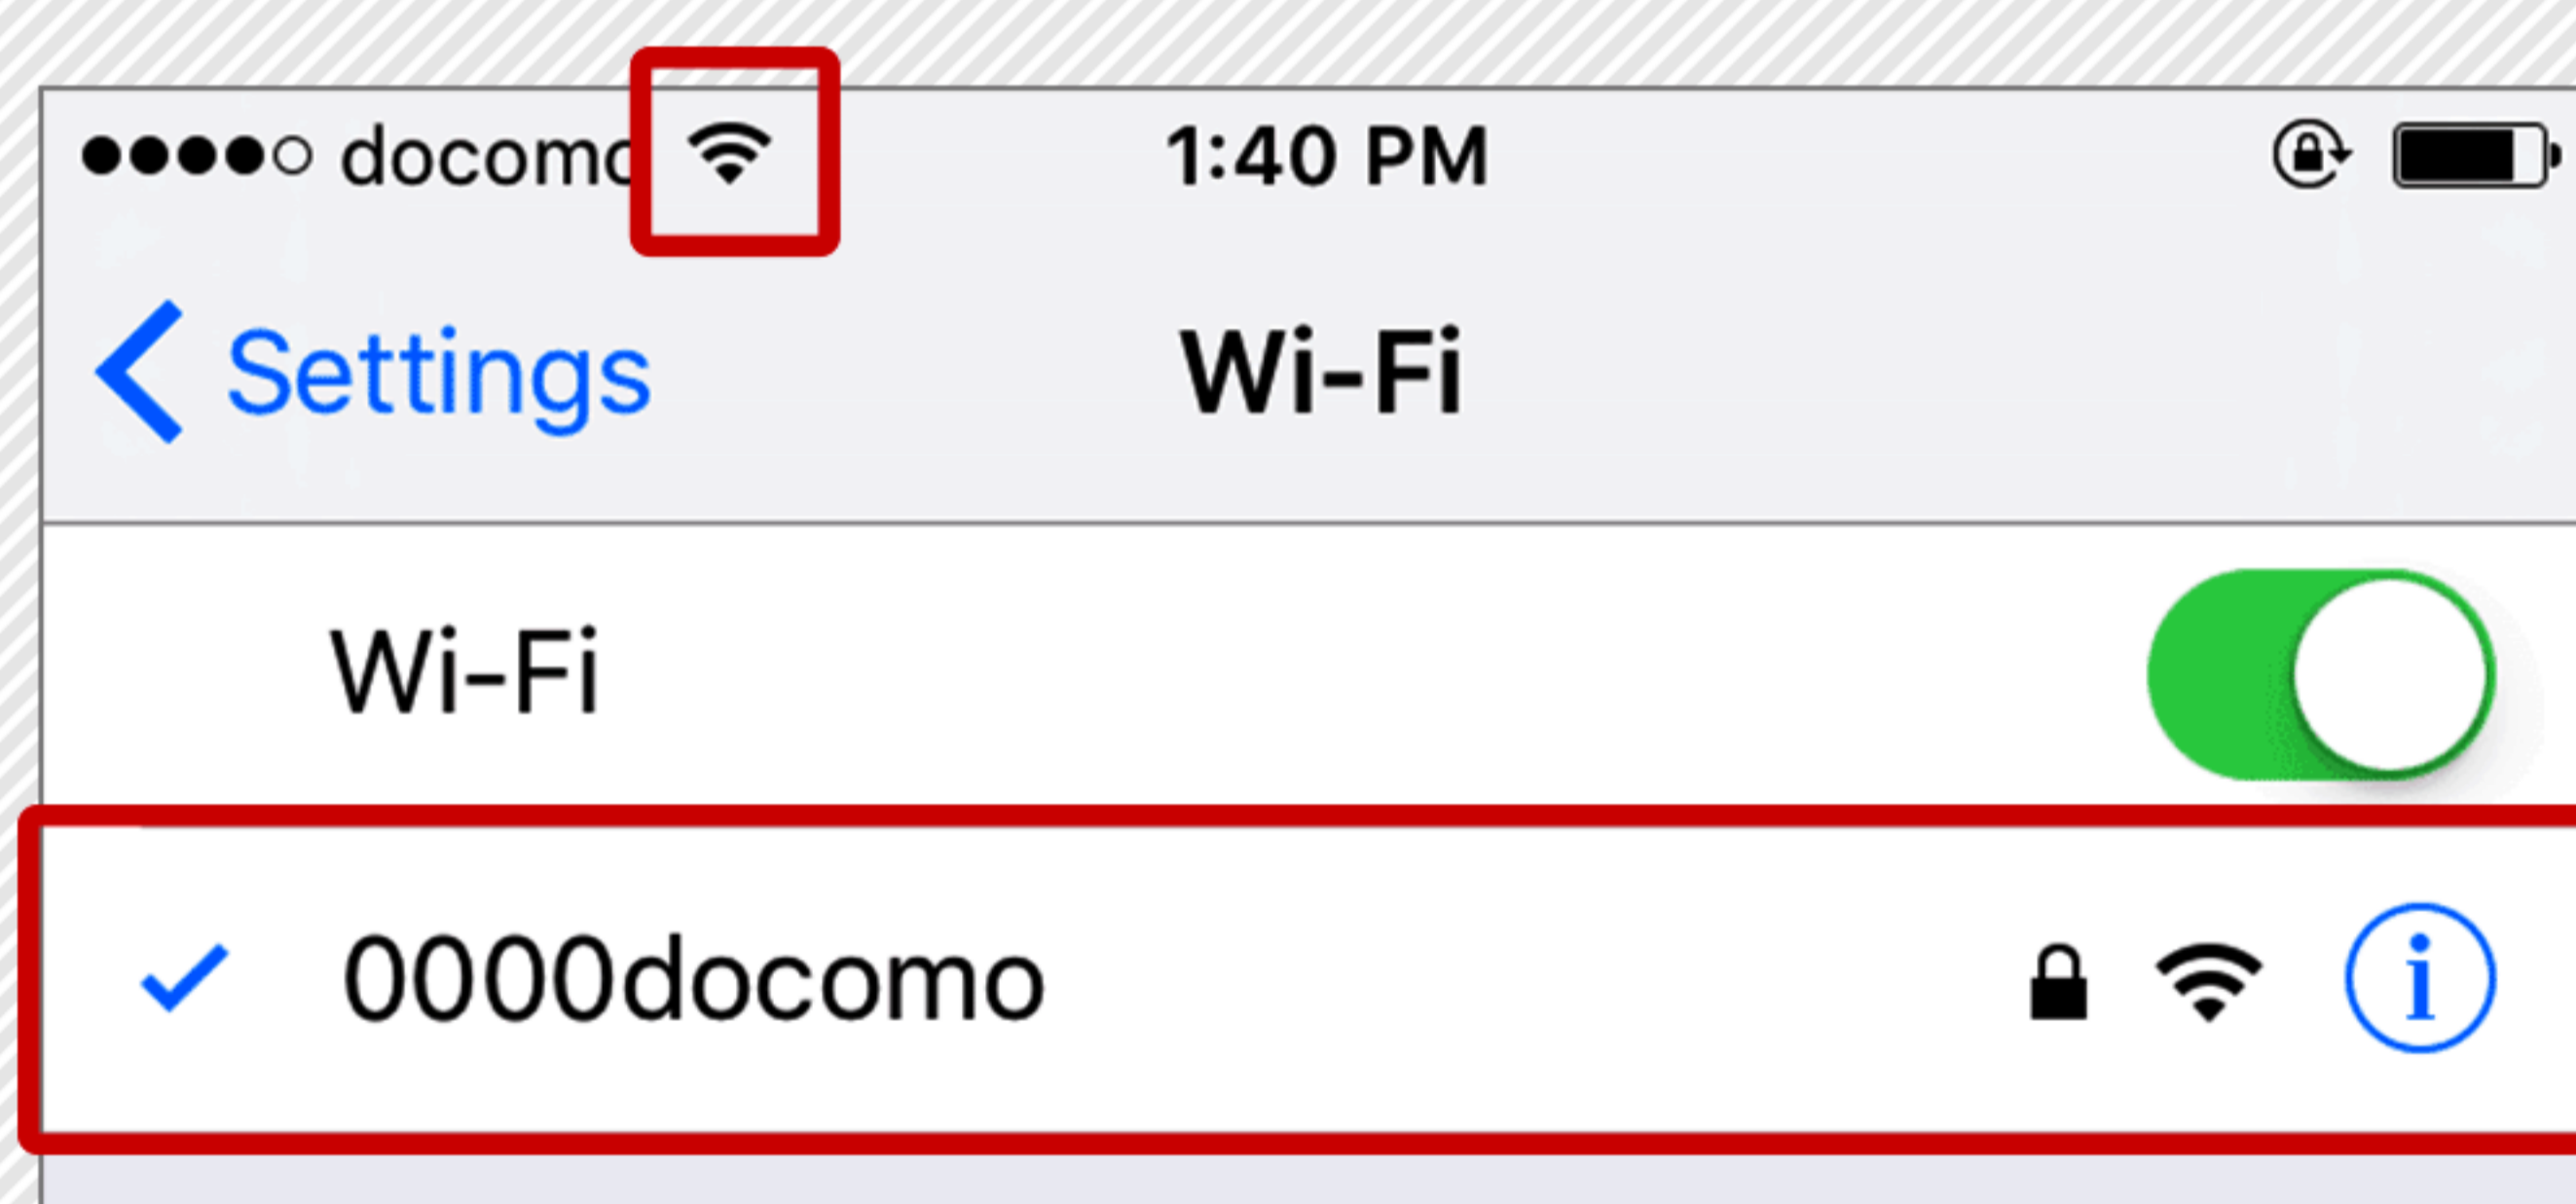

**Enter the Wi-Fi Password (Security Key) found in the application complete e-mail to connect.**

\* The "0000docomo" and "docomo" Wi-Fi Network Name (SSID) have different Wi-Fi Passwords (Security Keys) to be entered.

>>

4

Connection to the selected Wi-Fi network name (SSID) is complete. A Wi-Fi icon will appear on the status bar.

**It will be handy if you save this screen before your voyage begins !**

5

**! Take note!**

**From here**

The browser will run automatically, so select "**docomo Wi-Fi for visitors**" in the top-left of the screen above. Automatic operation may not function with certain devices, in which case you will need to run the browser manually.

6

### Log-in screen

Please enter your user ID and password (English half-width characters) and press the log-in button

User ID
<input type="text" value="Enter user ID"/> @visitor
Password
<input type="text" value="Enter password"/>

On the login screen, enter **the user ID/password found in the application complete e-mail** .

7

This completes the connection process ! You can now access the Internet via the Wi-Fi connection !

\* From the second time on, connection is automatic. If a connection is not made automatically, please proceed from step 5.
